Training 9:00 am – 5:00 pm

Lunch will be Noon – 1 pm

This is a one-day UDS training that allows health centers to familiarize staff with Federal submission requirements and procedures. The Upcoming training will focus on definitions of UDS data elements, locating and reporting these data elements, and common errors and problems to be avoided. The training will address each of the UDS tables including newly added data elements in Tables 6A, 9D, and 9E that HRSA introduced in July, 2009 for UDS data to be submitted in 2010. This training is useful for those who are responsible for gathering and reporting the data elements included in the UDS report, as well as management staff who need to understand the definitions and concepts used; and CEOs/Executive Directors who want to understand the process.

About the UDS: The UDS is a reporting requirement for grantees of the following primary care programs administered by the BPHC, HRSA: Community Health Center, Migrant Health Center, Health Care for the Homeless, Public Housing Primary Care, and any Section 330 funded Health Center. The UDS collects basic demographic information on patients you serve (e.g. race/ethnicity and insurance status of patients, etc.). UDS data are analyzed by HRSA to ensure compliance with legislative mandates, report program accomplishments, and justify budget requests to the U.S. Congress. The UDS also helps to identify trends over time to enable HRSA to establish or expand targeted programs, identify effective services and interventions to improve access to primary health care for vulnerable populations.
