Tips for Using the Template

Welcome and thank you for accessing the **Comprehensive Workforce Plan Template**. This template is designed as a companion document to the **Comprehensive Workforce Plan Toolkit Framework** document and outlines key areas, questions, and resources that will help your Health Center as you develop a Comprehensive Workforce Plan that addresses your workforce needs and plans for teaching and training students.

A comprehensive workforce plan is not a static document and needs continuous revision as the landscape of the Health Center workforce rapidly changes. For this reason, the Template and Toolkit will both remain ever-evolving.

This template is divided into categories that outline essential components to consider when developing your Health Center's comprehensive workforce plan. Each area contains important questions and components to consider when assessing your Health Center's workforce needs, and, where applicable, links to pertinent resources are provided.

Once again, we welcome each of your Health Centers to use, develop, adapt, and apply the Comprehensive Workforce Plan Template to meet the needs of your Health Center workforce and student training needs.

If you have any questions or resources, you would like included in the toolkit, please feel free to reach out to Suubi Mondesir, from NJPCA at mdariano@njpca.org.

Workforce Strategic Direction

To begin your health center's comprehensive workforce plan, first, take a minute to reflect on your Health Center's strategic direction, and what drives your workplace's efforts. Understanding your Health Center's mission, vision and goals will provide the guiding principles for your comprehensive workforce plan.

What is your organization's mission statement?

What is your organization's vision statement?

What are your strategic goals/workforce priorities?
